

Child Health Associates Vaccine Policy Statement

Child Health Associates follows the vaccine guidelines recommended by the American Academy of Pediatrics and the Center for Disease Control. Our providers practice within these recommendations since they are based on evidence driven scientific data and information. Vaccinating children is one of the most important health promoting and lifesaving interventions you as a parent can provide to your child(ren).

Child Health Associates does not accept new families that do not vaccinate their child(ren). Patients who are behind on the State of Michigan required vaccines will be given sufficient notice and time to bring their child up to date.

We prefer to remain your child's Pediatrician and will not dismiss any family who is actively working to properly vaccinate their child(ren). Our staff of doctors and nurses are here to help.

I have read and understand this vaccination policy and agree to comply
